

**Techno Curling**

**Welcome !  
Stick Curling for Everyone**

## The “TECHNO” Curling Delivery Stick is Remarkable!

Features:

- The connector is firmly seated on the base of the stone’s handle for accurate delivery.
- The articulated joint is designed to act as the wrist in the traditional delivery.
- The connector is designed to push on the inside front of the stone’s handle.
- The delivery stick is designed to provide delivery or to stop delivery.
- The tip of the stick remains in the centre of the stone in any rotation.
- The release of the stone is extremely smooth with no resistance.
- The length of the stick is adjustable from 1 to 1.75 M.
- The articulated joint allows a full 360 degree rotation.
- The connector and the articulated joint are made of sustainable material.
- The cylindrical handle is light in weight and made of aluminum alloy with an appropriate grip handle.
- The “Techno” Curling Delivery Stick has been thoroughly tested for superior accuracy and successful results.
